

Homework Instructions

Submission Deadline: The homework must be submitted within the next two weeks.

Grading Criteria:

- Your assignment will be graded as either **1 (Pass)** or **0 (Fail)**.
- To receive a passing grade, you must solve **75% or more** of the assignment correctly.
- **Feedback Policy:** Detailed feedback on individual solutions will not be provided. After the submission deadline, a complete solution will be published, allowing you to compare your work with the ideal solution. Use this to evaluate your approach and understand any mistakes.

Important:

- Please make sure to submit your work on time. Late submissions will not be accepted.
- **Solution Steps and Clarifications:** Be prepared! The lecturer may ask any student in your group during class or online to explain the solution steps and reasoning for any problem. Make sure that everyone in your group understands the approach and can explain why the problem was solved in that particular way.
- **Language:** You may write your answers in **German, English, or a mix of both**. Choose the language you feel most comfortable with.

This assignment will be a group presentation on a topic related to computer networks or new trends in networking. The task will allow you to explore a subject in detail, practice your presentation skills, and engage your peers in discussion.

Details

- Topic: Choose one subject from the list below or propose your own related topic.
 - Duration:
 - Presentation: 10 minutes
 - Questions & Answers: 5-10 minutes
 - Participation: All group members must contribute in the preparation and be present.
-

Topic Selection

- Select the topic on Moodle.
 - Topics will be assigned on a first-come, first-served basis. Duplicate topics will not be allowed within the class.
 - If you choose a topic that is not listed below, you should EMail the topic to the lecturer.
-

Requirements for the Presentation

1. Structure:
 - Introduction: Introduce your topic and explain its significance.
 - Main Content: Explore the topic's details, trends, and real-world applications.
 - Conclusion: Highlight key takeaways and discuss potential future developments.
2. Visuals: Use slides, diagrams, or demonstrations to enhance your presentation.
3. Engagement: Prepare to actively involve the audience in the Q&A session.

Good Luck
